

One-Way Flow Check Valve

High-quality check valve designed for manual tool applications. This valve ensures one-way flow, preventing backflow and maintaining system integrity.

Product Overview

Reliable One-Way Flow Control

This high-quality check valve is engineered specifically for manual tool applications, ensuring precise one-way flow control. Designed to prevent backflow, it plays a critical role in maintaining system integrity across various industrial environments. Its durable construction makes it an ideal component for demanding hydraulic and pneumatic systems.

Technical Specifications

Material	CrMo (Chromium Molybdenum Steel)
Size	36 mm
Compatible Applications	Hydraulic Systems, Pneumatic Systems, Manual Tooling

Key Features

Core Function

One-Way Flow • Backflow Prevention
