

One-Way Flow Control Check Valve

This check valve allows flow in only one direction, preventing backflow. It features robust metal construction for durability and easy installation into existing piping systems.

Product Overview

One-Way Flow Control Check Valve

This robust check valve is engineered to ensure unidirectional flow, effectively preventing backflow in critical pipelines and industrial systems. Constructed from durable metal, it offers excellent resistance to corrosion and long-term reliability. Featuring threaded connections for straightforward installation and a manual lever for operational testing, it is a versatile solution for various plumbing and industrial applications.

Technical Specifications

Flow Control	One-way (Unidirectional)
Material	Metal
Connection Type	Threaded

Features

Suitable Applications

- Industrial Pipelines
- Plumbing Systems
- Flow Control Systems

Key Features

Backflow Prevention, Corrosion Resistant, Manual Override Lever, Flow Direction Indicator
