

Online Double Conversion Uninterruptible Power Supply (UPS)

This uninterruptible power supply (UPS) features online double conversion and an output isolation transformer. It provides reliable backup power for IT devices, data centers, commercial facilities, and telecommunications equipment.

Overview

Reliable Power Protection

This Online Double Conversion Uninterruptible Power Supply is engineered to provide continuous, stable power for critical electronic equipment. It features advanced power conditioning and surge protection to safeguard sensitive devices against voltage fluctuations and outages. With its high-efficiency design and support for remote monitoring, this unit ensures business continuity for IT infrastructure and commercial facilities.

Technical Specifications

Topology	Online Double Conversion
Protection Features	Full Protection, Output Isolation Transformer, Surge Protection
Input Voltage Range	Wide input voltage range

Connectivity & Management

Communication Ports

- Intelligent RS232
- USB (Optional)
- SNMP Adapter (Optional)

Management Software	Yes
---------------------	-----

System Configuration

Battery Configuration

External Battery Bank (Optional) • Hot-swappable

Applications

Recommended Applications

- IT Devices
- Data Centers
- Commercial Facilities
- Telecommunications
- Industrial Equipment
