

Opaque Spherical LED Light Bulb

This spherical light bulb features a standard Edison screw base. The bulb's globe is made of a white, diffusing material designed to evenly distribute light.

Product Overview

Professional Diffused Lighting Solution

This opaque spherical LED light bulb is engineered for general lighting applications requiring soft, even light distribution. Featuring a durable diffusing globe and a standard metal Edison screw base, it ensures compatibility with common light sockets and reliable performance. It is an ideal choice for environments where glare reduction and uniform illumination are prioritized.

Physical Specifications

Shape	Spherical
Base Type	Edison screw
Materials	Opaque diffusing material, Metal base

Application & Performance

Lighting Effect

Soft light • Diffused light • Even distribution

Recommended Application	General lighting
