

# Open-Back Over-Ear Audiophile Headphones

These open-back, over-ear headphones are designed for audiophiles and music enthusiasts. The headphones feature a classic design with a silver metal frame and black earcups, providing a comfortable listening experience.

## Overview

### Audiophile Performance

These open-back, over-ear headphones are engineered for music enthusiasts seeking a natural and immersive listening experience. The open-back architecture creates a wide, spacious soundstage, while the 40mm drivers deliver precise audio reproduction. Designed for comfort and durability, the adjustable headband and classic aesthetic make them suitable for extended listening sessions.
