

Open Display Vegetable Refrigerator

This open display refrigerator features a completely open space for convenient access. Shelf height and angle can be adjusted, and a pull-out night curtain enables power saving.

Product Overview

Professional Produce Preservation

This open-front refrigerated display case is engineered specifically for commercial retail environments like supermarkets and grocery stores. Designed to maintain precise temperature and humidity levels, it ensures the longevity and visual appeal of fresh produce. The multi-tiered shelving configuration maximizes display capacity, enabling organized and attractive product merchandising while utilizing energy-efficient refrigeration technology for sustainable operation.

Technical Specifications
