

Open Frame Server Rack with Casters

Open frame server racks are designed for easy access to equipment and cabling. Equipped with casters for mobility, these racks feature universal mounting rails compatible with a wide range of servers and networking equipment.

Overview

Open Frame Server Rack Solution

This open frame server rack is engineered for high-density environments requiring easy access to equipment and cabling. Its universal mounting rails ensure broad compatibility with diverse servers and networking hardware. The open design maximizes airflow to maintain optimal operating temperatures, while the durable steel construction and integrated casters provide a robust, mobile solution for your infrastructure.

Physical Specifications

Finish

Black

Construction Material

Sturdy Steel

Features

Key Design Benefits

- Easy access to equipment
- Simplified cabling management
- Optimized airflow for cooling
- Universal mounting compatibility

Mobility

Yes
