

Optical Fiber Communication Cable

These cables are used in telecommunication plus power generation, transmission, and distribution. They offer high bandwidth and reliable data transmission.

Product Overview

High-Performance Optical Connectivity

This optical fiber communication cable is engineered for reliable data transmission across telecommunication, power generation, and distribution sectors. It features low signal attenuation and high bandwidth capacity, ensuring optimal signal integrity for demanding network environments. The robust construction is designed to withstand various environmental conditions, making it suitable for long-distance telecommunications, data centers, and high-speed internet infrastructure.

Technical Specifications

Primary Applications

- Long-distance telecommunications
- Data centers
- High-speed internet
- Power generation and distribution

Key Features

Low Signal Attenuation, High Bandwidth, Robust Construction, Minimal Insertion Loss

Aerial Installation

Construction Details

- Black outer jacket
- Strength member layer
- Internal buffering

ADSS Configuration

Yes
