

# Optical Lens for Physical Instruments

High-quality optical lenses are designed for physical optical instruments. These lenses are crafted for precision and clarity, ensuring optimal performance in various optical applications.

## Product Overview

### High-Precision Optical Lens

This high-quality optical lens is specifically engineered for use in physical optical instruments, such as microscopes and scientific measurement devices. Crafted for superior clarity and precision, it ensures optimal performance and enhanced image resolution for accurate scientific work. Each unit undergoes rigorous testing to meet stringent quality standards, guaranteeing reliability and durability in demanding laboratory environments.

## Technical Specifications

Magnification	20 X
Field of View Number	12 mm
Lens Type	Wide Field (WF)

## Quality Assurance

Quality Compliance	Rigorous Testing, High Precision, Scientific Grade
--------------------	--

## Performance Metrics

### Key Performance Metrics

<b>20 X</b> Magnification	<b>12 mm</b> Field Number
