

Optical Telescope and Binoculars Set

This optical instrument enhances visibility for observing distant objects. Its durable construction and compact design make it suitable for outdoor activities and scientific observations.

Product Overview

Professional Optical Observation Set

This comprehensive set includes an optical telescope and binoculars designed for high-clarity magnification of distant objects. Engineered with a durable cylindrical body and precision optics, this equipment ensures reliable performance for scientific observation or outdoor activities. The compact, portable design provides professional buyers with a versatile solution for long-range viewing tasks.

Technical Specifications

Applications

- Scientific Observation
- Outdoor Activities
- Distant Object Magnification

Construction

Durable Material, Cylindrical Optics

Design Features

Design Configuration

| Component | Description |
|----------------|---|
| Eyeiece | Located at one end for observation |
| Objective Lens | Located at opposite end for light gathering |

Portability

Yes
