

Orange Juice Carton Shrink Wrapping Machine

This automatic machine is designed for shrink wrapping orange juice cartons or bottles. It uses a vertical form fill seal (VFFS) system and a heat shrink tunnel to tightly wrap the product.

Product Overview

Automatic Shrink Wrapping Solution

This automatic shrink packaging machine is engineered specifically for the efficient wrapping of orange juice cartons and bottles. Utilizing a vertical form fill seal (VFFS) system combined with an integrated heat shrink tunnel, it ensures a tight, professional finish for high-volume production lines. The unit is constructed from durable stainless steel to meet hygiene standards and features advanced automation for consistent performance.

Technical Specifications

Key Operational Features

- Adjustable film tension
- Temperature control for sealing
- Temperature control for shrinking
- Vertical form fill seal (VFFS) system
- Integrated heat shrink tunnel

Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)

Safety & Versatility

Safety Mechanisms	Emergency Stop, Safety Guards
Application Compatibility	Suitable for various package sizes and film types
