

Orbital Power Sander for Wood and Metal

This power sander is designed for surface preparation and finishing on various materials. It features an ergonomic grip, variable speed control, and efficient dust collection.

Product Overview

Professional Performance Sanding

This orbital power sander is engineered for precise surface preparation and finishing on both wood and metal surfaces. Its advanced design incorporates variable speed control to match various material requirements while maintaining consistent, swirl-free results. Built for durability in demanding environments, the tool features an ergonomic grip and an integrated dust collection system to maximize efficiency and user comfort.

Key Features

Applicable Materials	Wood, Metal
Sanding Action	Orbital / Random Orbital

Technical Specifications

Control Features

- Variable speed control
- Ergonomic handle grip
- Integrated dust collection system

Model Identifier	222240
