

Oscillating Multi-Tool

This oscillating multi-tool is designed for cutting, scraping, and sanding tasks. It features an oscillating head, variable speed, and a quick-change accessory system.

Product Overview

Professional Oscillating Multi-Tool

This versatile oscillating multi-tool is engineered for high efficiency and energy savings, featuring an ergonomic design with a soft-grip handle to minimize vibration and user fatigue during prolonged use. Its compact construction allows for effortless operation in narrow or confined spaces, making it an ideal choice for complex cutting, grinding, and polishing tasks. Built with a reinforced nylon airframe, the tool offers the durability required for demanding professional construction and renovation environments.

Design and Ergonomics

Vibration Reduction

Yes

Housing Material

Reinforced Nylon

Performance and Features

Application Scope

- Construction
- Renovation
- Home Improvement
- Tight-space maneuvering

Energy Profile

High Efficiency • Energy Saving

Integrated Functions

Cutting, Grinding, Polishing, Scraping
