

Outboard Motor Propeller and Gearbox Assembly

This is an outboard motor propeller and gearbox assembly. It is an essential component for marine propulsion systems.

Product Overview

Marine Propulsion Assembly

This outboard motor propeller and gearbox assembly is designed for reliable marine propulsion. The set includes two primary model variations to suit different requirements, offering durable performance for aquatic environments. These essential components are built for easy integration into standard marine propulsion systems.

Technical Specifications

Model Variants

- T-15BML
- T-3.6BML

Rated Indicators

15 HP Class • Standard Gearbox

Application

Marine, Outboard Propulsion
