

# Outdoor Animal Deterrent with PIR Sensor

This device uses a passive infrared sensor to detect motion and deter animals from entering specific areas. It emits ultrasonic sound waves and flashing strobe lights to repel animals effectively.

## Product Overview

### Effective Animal Deterrence

The HCX-K704 PIR Animal Repeller is an electronic solution designed to protect your outdoor spaces from unwanted animal intrusion. By utilizing a Passive Infrared (PIR) sensor, the device detects motion and triggers ultrasonic sound waves to humanely deter pests such as dogs, cats, deer, raccoons, and rodents. It is built for outdoor reliability, providing coverage for up to 300 square meters.

## Technical Specifications

|                      |                  |
|----------------------|------------------|
| Ultrasonic Frequency | 25 KHz           |
| PIR Detection Range  | 10 meters        |
| Coverage Area        | 300 Sq. M.       |
| PIR Sensor Angle     | 90 - 120 degrees |

## Power & Efficiency

### Power Consumption

**0.3 mAh**

Standby

**25 mAh**

Working

|              |                                 |
|--------------|---------------------------------|
| Power Source | 4 x AA Batteries (not included) |
|--------------|---------------------------------|

## Target Pests

|                   |   |
|-------------------|---|
| Deterrent Targets | Dogs, Cats, Deer, Raccoons, Skunk, Foxes, Squirrels, Mice, Rats |
|-------------------|---|
