

Outdoor Digital TV Antenna

This high-gain outdoor TV antenna is designed for receiving over-the-air digital television signals. Its multi-element design includes dipole elements and a reflector screen to enhance signal reception and improve picture quality.

Product Overview

High-Performance Signal Reception

This outdoor digital TV antenna is engineered for high-gain performance, ensuring reliable over-the-air signal reception for digital television. Featuring a robust multi-element design with dipole components and a dedicated reflector screen, it delivers superior picture quality across VHF and UHF frequency bands. Constructed with weather-resistant materials, this unit is built for durability and long-term reliability in outdoor environments.

Technical Specifications

Key Design Elements

- Multi-element construction
- High-gain dipole elements
- Integrated reflector screen

Supported Frequencies

VHF, UHF

Installation and Durability

Environmental Protection

Weather-resistant

Mounting Method

Pole or mast mount
