

Outdoor Fiber Optic Distribution Box

This outdoor fiber optic distribution box is designed for telecommunication infrastructure. It features a robust, weather-resistant enclosure with hinges and a lockable mechanism.

Product Overview

Robust Outdoor Connectivity

This outdoor fiber optic distribution box is engineered for reliable performance in demanding telecommunication environments. Featuring a weather-resistant enclosure with a secure, lockable mechanism, it ensures the safety and integrity of fiber optic connections. It is an essential component for managing and distributing data transmission cables in outdoor infrastructure.

Physical Characteristics

Enclosure Type	Outdoor Weather-Resistant
Security Features	Lockable Mechanism, Hinged Door

Technical Specifications

Primary Application	Telecommunication Infrastructure
Function	Fiber Optic Cable Management
Model Series	GPXBT
