Overview

Professional Outdoor LED Post Top Lighting

This LED post top light is engineered for reliable outdoor illumination in parks, pathways, and public spaces. Featuring a durable die-cast aluminum housing with an electrostatic spraying finish, it offers excellent corrosion resistance and efficient heat dissipation. The unit delivers uniform light distribution with high luminous efficacy, making it an ideal choice for enhancing safety and aesthetics in various architectural environments.

Technical Specifications

Available Wattage

- 45
- 60
- 70
- 80
- 100
- 120

Ingress Protection

IP66

Luminous Efficacy

100 lm/W

Certifications

CE, ETL

Warranty

5 years

Construction & Design

Robust Build Quality

The fixture is constructed from high-quality die-cast aluminum, ensuring structural integrity and long-term durability. It incorporates a specialized radiator design for superior heat dissipation, and the exterior is treated with an electrostatic spraying finish to provide enhanced resistance against environmental corrosion.
