

Outdoor LED Solar Flood Light

This LED solar flood light is designed for outdoor illumination. Its integrated solar panel allows for autonomous operation, making it suitable for security and landscape lighting.

Overview

High-Efficiency Outdoor Illumination

This outdoor LED solar flood light is engineered for reliable, autonomous operation in diverse environments. Featuring a durable construction and an integrated solar panel, it eliminates the need for external power sources, making it an ideal choice for security, landscape, and general area lighting. The system is designed to provide consistent performance across various power requirements.

Technical Specifications

Available Power Options

- 40W
- 60W
- 120W
- 200W

Model Number	TTG-13
--------------	--------

Key Features

Design Features

Integrated Solar Panel • Durable Construction • Autonomous Operation

Ideal Applications	Security Lighting, Landscape Lighting, General Area Illumination
