Product Overview

Sustainable Outdoor Illumination

This self-contained solar street light offers a high-efficiency solution for autonomous outdoor lighting. Featuring advanced monocrystalline solar panels and high-capacity LiFePO4 battery technology, it ensures reliable operation in various environmental conditions. Its robust, weather-resistant design is built for durability, making it an ideal choice for streets, parking lots, and public pathways.

Technical Specifications

Solar Panel Technology	Monocrystalline
Battery Type	LiFePO4 Lithium
Key Features	Energy Efficient, Weatherproof, Easy Installation, Low Maintenance

Application & Design

Installation Options

- Roadways
- Parking lots
- Public pathways
- Open outdoor areas

Mounting Hardware	Yes
