

Outdoor Network Communication Enclosure

This robust outdoor network communication enclosure protects sensitive electronic equipment from environmental factors. Its modular design includes a raised base, lockable double doors, and ventilation.

Product Overview

Robust Outdoor Protection

This outdoor network communication enclosure is engineered to safeguard sensitive electronic equipment against harsh environmental conditions. Featuring a modular design with a durable, light gray finish, it provides a secure and reliable housing solution for telecommunications and networking hardware. The unit is equipped with integrated ventilation and lockable double doors to ensure optimal performance and security in outdoor or industrial settings.

Design & Construction

Enclosure Type	Modular Outdoor Network Enclosure
Access Security	Lockable Double Doors, Secure Access
Finish	Light Gray

Environmental Control

Protection Features

Weatherproof • Environmental Protection

Ventilation	Yes
