

Outdoor Network Fiber Optic Repeater

This network device is a fiber optic repeater designed for outdoor installation. It is housed in a weatherproof enclosure and used to maintain network coverage.

Product Overview

High-Performance Outdoor Connectivity

This outdoor network fiber optic repeater is engineered for robust data transmission in challenging external environments. Designed with a durable, weatherproof enclosure, it ensures reliable network expansion and signal integrity over extended distances. It serves as an essential infrastructure component for telecommunications, internet service providers, and private network deployments requiring stable connectivity.

Technical Specifications

Device Type	Fiber Optic Repeater
Installation Environment	Outdoor
Primary Applications	Telecommunications, ISP Infrastructure, Private Network Deployment, Data Transmission

Design & Build

Enclosure Rating	Weatherproof
Mounting	Pole-mounted
