Product Overview

Efficient Outdoor Illumination

This outdoor solar LED bollard light is an off-grid lighting solution designed for residential and commercial landscape enhancement. Featuring a high-efficiency monocrystalline solar panel and a durable die-casting aluminum shell, it offers reliable performance with anti-corrosion and anti-oxidation properties. The system includes intelligent light control and requires no cabling or trenching, making it a cost-effective choice for easy installation and maintenance.

Power & Performance

Working Time

23 hours

Working Hours

Solar Panel Type: Monocrystalline Grade A

Solar Panel Power: 2 W

Battery & Durability

Ingress Protection

IP65

Battery Chemistry: LiFePO4 Lithium

Battery Life Cycles: 2000

Construction & Design

Installation Benefits

- No cabling required
- No trenching required
- Easy installation
- Maintenance-free

Body Material	Die-casting Aluminum
---------------	----------------------

Diffuser Material	High-impact PC
