

Outdoor Shielded Twisted-Pair Cable - 4 Pair

This outdoor cable features four twisted pairs of insulated conductors with distinct color coding. Its metallic shielding layer provides enhanced protection against electromagnetic interference.

Product Overview

High-Performance Outdoor Connectivity

This outdoor shielded twisted-pair cable is engineered for reliable data transmission in demanding environments. Featuring four pairs of high-density polyethylene insulated copper conductors, it ensures consistent signal quality and low transmission delay. The UV-resistant PE sheath provides robust protection, making it an ideal choice for outdoor level subsystems and installations requiring superior electromagnetic interference resistance.

Technical Specifications

Conductor Construction	4 Pair Single-strand Copper Wire
Insulation Material	High-density Polyethylene (HDPE)
Sheath Material	UV-resistant PE

Performance Features

Key Benefits

- Enhanced electromagnetic interference (EMI) protection
- Low transmission delay
- UV-resistant outdoor durability
- Consistent insulation quality
- Small outer diameter to reduce installation distortion

Compliance & Application

Applications	Outdoor Subsystems, Data Transmission, Network Infrastructure
