

Outdoor Solar LED Security Light

This self-contained outdoor lighting solution features an integrated solar panel for charging. The light has a motion sensor that activates the LEDs when movement is detected, and its robust housing is weather-resistant.

Product Overview

Solar-Powered Security Illumination

This self-contained outdoor LED security light is engineered for reliable, energy-efficient performance in diverse environments. Featuring an integrated solar panel, it charges its internal battery throughout the day to provide automatic nighttime illumination. The built-in motion sensor enhances security by activating the LEDs upon detecting movement, ensuring safety while maximizing battery life.

Technical Specifications

Power Source	Integrated Solar Panel
Sensor Type	Motion Sensor
Weather Resistance	Yes

Installation & Design

Design Features

- Self-contained lighting unit
- Integrated solar charging
- Motion-activated illumination
- Robust, weather-resistant housing

Mounting Options	Wall Mount, Fence Mount
