Product Overview

Efficient Outdoor Illumination

This solar-powered LED wall light is an ideal solution for enhancing outdoor visibility in gardens, pathways, and entrance areas. Designed for energy efficiency, it utilizes a built-in solar panel to charge its internal battery during the day, ensuring automatic illumination at night. The integrated motion sensor adds a layer of convenience and security by activating the light only when movement is detected.

Technical Specifications

Luminous Flux

230 lm
Brightness

Solar Panel

- Voltage: 5.5V
- Power: 1W
- Current: 180mA

Battery Details

18650 Lithium-ion, 1200mAh

Application

Key Features

Motion Sensor • Solar Powered • Automatic Activation • Weather Resistant

Recommended Use

Garden, Pathway, Patio, Entrance
