Product Overview

Professional Solar Pillar Lighting

This high-efficiency outdoor solar pillar light is engineered for durability and reliable performance in demanding environments. Featuring an integrated LED array and a solar-powered design, it eliminates the need for external wiring or electrical outlets. Its weather-resistant and corrosion-resistant construction makes it an ideal lighting solution for marinas, docks, decks, and expansive outdoor landscapes.

Key Features

Installation

Easy installation with no wiring or outlets required

Durability Profile

Weatherproof, Rustproof, Corrosion-resistant, Impact-resistant

Technical Specifications

Performance Metrics

100 % Solar

Energy Source

Material Composition

- Clear acrylic dome and supports
- Impact-resistant top cover
- Corrosion-resistant marine hardware

Applications

Recommended Use Cases

Marinas • Docks • Decks • Pathways • Landscapes
