## Product Overview

### Sustainable Outdoor Lighting

The DR-0580 Solar Garden Light provides a wireless, energy-efficient solution for illuminating landscapes, pathways, and gardens. Designed for convenience and durability, it features an integrated solar panel that automatically recharges during the day and triggers illumination at dusk. Its stake-based design ensures rapid, secure ground installation without the need for complex wiring.

## Technical Specifications

### Durability

- Weather-resistant construction
- Eco-friendly operation
- Energy-efficient LED technology

### Installation

Stake-mounted (Wireless)

### Power Source

Integrated Solar Panel

### Automation

Automatic Night Activation, Daytime Recharging

## Design and Aesthetics

### Physical Design

Black Finish • Clear Lens • Conical Diffuser
