Product Overview

Sustainable Outdoor Illumination

The DR-3148 solar spotlight offers a versatile, wireless solution for illuminating gardens, pathways, and outdoor landscapes. By utilizing an integrated solar panel for daytime recharging, this unit automatically activates at night to provide efficient directional lighting. Its weather-resistant construction ensures durability, while the simple ground stake design allows for rapid, tool-free installation in various outdoor environments.

Technical Specifications

Power Source	Solar Energy
Installation	Wireless, Ground Stake
Smart Features	Auto-on at night, Daytime charging
Lighting Technology	LED

Design & Construction

Environmental Resilience

Weather-resistant • Outdoor-rated

Lighting Direction	Yes
