

Outdoor Solar Street Light with Integrated Panel

This high-efficiency solar street light is designed for outdoor illumination. It features a durable construction and automatic dusk-to-dawn operation for energy saving.

Product Overview

High-Efficiency Outdoor Solar Lighting

This outdoor solar street light features an integrated solar panel design, eliminating the need for complex wiring and grid dependency. Built with durable materials to withstand various weather conditions, it offers a sustainable and cost-effective lighting solution for municipal and commercial infrastructure. The automatic dusk-to-dawn operation ensures energy efficiency while providing reliable illumination for streets, pathways, and parking lots.

Key Features

Integrated Solar Panel, Dusk-to-Dawn Operation, Weatherproof, Energy Saving, Outdoor Rated

Applications

Suitable Environments

- Public Streets
- Pedestrian Pathways
- Commercial Parking Lots
- Outdoor Security Areas
