Product Overview

Sustainable Outdoor Lighting

This integrated solar street light provides a high-efficiency lighting solution designed for diverse outdoor environments ranging from the equator to polar regions. Featuring a modular, all-in-one design, it eliminates the need for complex external wiring and significantly simplifies installation. Built with long-lasting LiFePO4 battery technology and durable weather-resistant components, this system offers a reliable, low-voltage, and autonomous lighting experience.

Technical Specifications

LED Life Span	50000 hrs
Battery Technology	LiFePO4
Design Features	Integrated, Modular, Low Voltage, Weather-resistant

Application

Primary Applications

- Streets and roads
- Residential areas
- Scenic spots
- Parks and squares
- Private gardens
