

Outdoor Telephone Cable

Outdoor telephone cables are designed for external communication networks. These cables include options like HYVV, aerial, HYA53 filled, and jelly-filled variations.

Product Overview

Professional Outdoor Telephone Cabling

This range of outdoor telephone cables is engineered for reliable communication infrastructure, offering versatile solutions for aerial and buried installations. Available in multiple configurations including HYVV, aerial, and jelly-filled HYA53 types, these cables ensure signal integrity across various environmental conditions. With conductor diameters ranging from 0.4mm to 0.7mm and pair counts up to 100, they are suitable for diverse telecommunication network requirements.

Technical Specifications

Conductor Diameter

0.4 mm

Minimum Diameter

0.7 mm

Maximum Diameter

Available Pair Counts

- 5
- 10
- 20
- 50
- 100

Cable Construction

Materials Used

Component	Material
Conductor	Copper
Insulation	PVC or PE
Sheath	PVC or PE
Filling	Filling Compound / Jelly
Shielding	Aluminium Tape

Available Cable Types

HYVV, Aerial, HYA53 Filled, Jelly Filled
