Product Overview

High-Performance Outdoor Networking

This outdoor-rated LAN cable is engineered for reliable network connectivity in challenging environmental conditions. Available in both UTP CAT5e and CAT6 configurations, it features twisted pair conductors designed to minimize interference and maintain signal integrity. With a durable outer jacket built for weather resistance, this cabling solution is ideal for outdoor installations requiring long-term performance and high-speed data transmission.

Technical Specifications

Application Environment

Outdoor • Weather-resistant

Performance Features

- Twisted pair conductors for reduced interference
- Enhanced signal quality
- Durable outer jacket for weather protection
- High-speed data transmission support

Available Configurations

UTP CAT5e, UTP CAT6

Cable Type

Unshielded Twisted Pair (UTP)
