

Overlay Cabinet Hinge for Frameless and Face-Frame Cabinets

This overlay cabinet hinge is designed for frameless and face-frame cabinets, allowing the door to overlay the cabinet opening. It consists of leaves that attach to the cabinet door and the interior side of the cabinet, providing a pivot point for smooth operation.

Product Overview

Professional Overlay Cabinet Hinge

This overlay cabinet hinge is engineered for reliable performance in both frameless and face-frame cabinet applications. Designed to allow the cabinet door to partially or fully cover the cabinet frame, this hinge provides a smooth, consistent pivot point for daily operation. Its robust metal construction and multiple mounting points ensure a secure, long-lasting installation for professional cabinetry projects.
