

Overpass Lighting and Environmental Engineering Project

This project encompasses the lighting and environmental design of an overpass. The design covers an area of 91,267 square meters.

Project Overview

Daqing Overpass Infrastructure Engineering

This municipal infrastructure project focused on the lighting and environmental enhancement of the SaHuan East Road overpass in Daqing. The project integrates historical, cultural, and artistic elements with functional design, emphasizing a people-oriented approach to urban landscape development. By incorporating ecological design principles, the project fosters sustainable urban growth while enhancing the local environment for the community.
