

# Overseas Engineering and Construction Projects

These projects encompass general and specialized contracting work. Featured are steel structure fabrication and erection, plus municipal and civil construction engineering.

## ADDITIONAL IMAGES

## Project Overview

### International Engineering Excellence

Our overseas construction portfolio encompasses large-scale, multidisciplinary engineering projects executed globally. We specialize in complex architectural developments, including entertainment resorts, cultural institutions, and sports infrastructure, integrating modern design with sustainable construction practices. Our commitment to quality and environmental standards is evidenced by prestigious international awards and recognition in green construction.

### Project Categories

Resort Complexes, Cultural Facilities, Sports Arenas, Hospitality Infrastructure, Large-scale Urban Development

## Technical Capabilities

### Design & Engineering Features

- Complex architectural structural design
- Advanced stadium engineering
- Sustainable and green construction integration
- Large-scale site planning and infrastructure
- Multi-functional facility development

### Awards & Standards

China Architecture Luban Award • Singapore Green Construction Excellence Award
