

Oxygen-Free Copper Core Audio Power Cable

This audio power cable is designed for professional stage sound and audio engineering applications. It features an oxygen-free copper wire core, PVC insulation, and a durable PVC outer sheath.

Product Overview

High-Fidelity Audio Connectivity

This professional-grade audio power cable is engineered for lossless signal transmission in demanding environments such as stage sound systems and conference rooms. Featuring a 99.99% oxygen-free copper core and reinforced with high-elasticity PVC, it ensures consistent, high-quality audio performance. Designed for durability and precision, it meets rigorous safety standards for public and private audio engineering applications.

Technical Specifications

Operating Temperature

70 °C

Max Operating Temp

0 °C

Min Laying Temp

Conductor Material	99.99% Oxygen-Free Copper
Insulation Material	PVC
Internal Filler	Tensile Fiber, Cotton Paper

Compliance & Quality

Standards & Certifications

3C Certification • JB8734.5-2016

Usage

Recommended Applications

- Stage speaker systems
- Conference room audio
- Audio engineering
- Public place speaker systems
