

Oxygen-Free Heat Exchanger Gas Water Heater

This gas water heater features a durable oxygen-free heat exchanger. It includes an LED display, touch button controls, and multiple safety protections including overheating and flameout protection.

Overview

High-Efficiency Heating Solution

This oxygen-free heat exchanger gas water heater is engineered for durable, consistent performance in modern households. It features advanced temperature control and integrated safety mechanisms to ensure a reliable hot water supply. Designed with energy efficiency in mind, this unit meets Level 2 standards, making it an ideal choice for sustainable home heating.

Performance

Rated Heat Input

24 kW

Standard Model

30 kW

High-Capacity Model

Hot Water Capacity (t=25)

12 L/min

Standard

16 L/min

High-Capacity

Technical Specifications

Energy Efficiency Standard

Level 2

Water Pressure Range

0.02 ~ 0.8 MPa

Exhaust Method

Constant temperature strong exhaust

Gas Compatibility

Supported Gas Types

Gas Type	Rated Pressure
NG (Natural Gas)	2000 Pa
LPG (Liquefied Petroleum Gas)	2800 Pa

Dimensions

Product Dimensions (W*H*D)

- 516 x 320 x 155 mm
- 580 x 350 x 165 mm
