

Ozone Water and Air Sterilizer with Timer

This ozone generator outputs 400 mg/h for effective sterilization. It features a timer function and consumes only 10W of power.

Product Overview

Versatile Ozone Sterilization System

This multi-functional ozone generator is engineered for comprehensive home sanitation, effectively purifying both air and water. By utilizing advanced ozone technology, the device eliminates odors, neutralizes viruses, and detoxifies surfaces, making it an essential tool for maintaining a hygienic living environment. With an integrated timer ranging from 10 to 60 minutes, it offers precise control for various applications including food preparation, pet care, and general household sanitation.

Technical Specifications

Timer Range

10 min

Minimum Time

60 min

Maximum Time

Applications

Detailed Application Areas

- Agriculture chemical detoxification for produce
- Air purification and odor removal
- Sanitizing children's items and toys
- Kitchenware and dishware sterilization
- Textile disinfection (underwear, towels)
- Personal hygiene (face washing, oral care)
- Aquarium maintenance and water quality improvement
- Pet odor and parasite control

Primary Use Cases

Air Purification, Water Sterilization, Food Detoxification, Odor Removal, Personal Hygiene, Pet Care

Benefits

Key Benefits

Virus Neutralization • Chemical Detoxification • Odor Elimination • Oxygen Density Improvement • Sanitary Environment Maintenance
