

Ozone Water Purification System for Home Use

This household water purification system uses ozone technology to eliminate viruses and purify water. It features a timer control panel and a remote control for convenient operation.

Overview

Dual-Action Purification Technology

This advanced purification system combines ozone technology with high-density negative ions to create a healthier home environment. It effectively neutralizes airborne viruses, removes odors such as cigarette smoke and pet smells, and eliminates harmful gases from indoor materials. Additionally, the system can be used to generate ozone-treated water, perfect for washing produce, cleaning kitchen tools, and personal care routines.

Technical Features

Timer Intervals

- 10
- 20
- 30
- 45
- 60

Control System

Micro-computer controlled with remote operation

Operation Modes

Ozone Only, Negative Ion Only, Simultaneous Operation

Applications

Air Purification Benefits

Virus Elimination • Odor Removal • Allergen Reduction • Harmful Gas Neutralization

Ozone Water Uses

Application	Benefit
Food Preparation	Eliminate agrochemicals and extend storage life
Kitchenware	Sanitize dinner tools and utensils
Personal Care	Face washing, hair washing, and showering
