## Product Overview

### Versatile Indoor LED Solution

This indoor full-color LED display module is engineered for both fixed installations and rental applications. It features a high-refresh rate and a user-friendly front-service design, allowing for efficient maintenance and module replacement. Built with high-quality components, it offers stable performance, high brightness, and excellent heat dissipation for reliable long-term operation.

## Technical Specifications

Pixel Pitch Options	P3.91, P4.81
Interface	HUB75

## Design & Build

Cabinet Material	Die-cast aluminum
Cabinet Size	500mm x 500mm
Cabinet Weight	8 kg
Edge Thickness	36 mm

## Performance Features

### Key Features

Front Service Access • High Refresh Rate • Moisture Proof • Corrosion Proof • Modular Design

### Mounting Options

- Hoisting (Hanging)
- Ground-support

### Max Hanging Height

**10.368 m**

Max Height

**18 layers**
