

PA66 Cable Clip with Pre-Inserted Nail

These cable clips are made from PA66 material. They feature a pre-inserted nail for easy and secure cable management.

Overview

High-Performance Cable Management

These PA66 cable clips feature pre-inserted nails for fast and efficient installation in professional environments. Engineered for durability, they provide a secure and organized solution for cable routing, ensuring a neat finish while preventing cable damage. The robust construction is designed to withstand demanding industrial conditions, making them ideal for long-term cable management needs.
