Product Overview

High-Efficiency Automatic Strapping Solution

This automated packaging machine is designed to streamline baling processes within industrial assembly lines. It features a robust tabletop with integrated power rollers, making it ideal for handling irregular package shapes and sizes. Engineered for energy efficiency, it includes automatic shutdown capabilities and a silent, dust-protected drive system for consistent, reliable operation.

Operational Features

Operational Mode

Automatic • Unmanned-ready

Binding Channels

- Manual parallel (1 to multi-channel)
- Photoelectric control (2 channels)
