

# Packaging Machinery Guide Component

This white plastic component is designed for use in packaging machinery. It features three vertical U-shaped channels for aligning and guiding products during the packaging process.

## Product Overview

### Industrial Packaging Guide Component

This precision-engineered guide component is designed to enhance efficiency in automated packaging machinery. Featuring a robust design with three vertical U-shaped channels, it provides reliable alignment and separation for products during high-speed processing. Constructed from durable, food-grade plastic, this component is built to withstand the rigors of industrial environments while maintaining strict hygiene standards.

## Technical Specifications

### Key Design Features

- Three vertical U-shaped channels
- Rectangular base support
- High-precision alignment slots

### Durability

Industrial Grade • Food Safe

### Material

Food-grade industrial plastic

### Application Suitability

Packaging Machinery, Product Alignment, Product Separation, Food Processing
