

Packaging Material Roll

This roll of packaging material is designed for use in packaging machinery. The reflective surface provides barrier properties against moisture, light, and gases, which extends the shelf life of the packaged product.

Product Overview

High-Performance Packaging Material Roll

This premium packaging material roll is engineered for high-speed industrial packaging machinery. Featuring a reflective metallic surface, the film provides superior barrier properties against moisture, light, and gases, ensuring optimal product preservation. It is an ideal solution for maintaining integrity in food, pharmaceutical, and industrial applications.

Technical Specifications

Material Composition	Metallic Film (Aluminum Foil)
Barrier Protection	Moisture Resistant, Light Barrier, Gas Barrier

Applications

Industry Applications

- Food Packaging
- Pharmaceutical Packaging
- Industrial Wrapping

Compatibility

Packaging Machinery Ready
