

# Padded Cycling Gloves with Breathable Fabric

These cycling gloves provide comfort and control during rides. They feature padded palms for shock absorption and breathable materials for ventilation.

## Overview

### High-Performance Cycling Gloves

These padded cycling gloves are engineered for professional and recreational riders seeking a balance of comfort and control. Featuring breathable spandex on the back and a microfiber palm with SBR cushioning, they provide excellent vibration dampening and ventilation. The addition of colorful reflective elements ensures enhanced visibility and safety during low-light conditions.

## Technical Specifications

Item Number

KCY-C20-18

## Material & Construction

Palm Materials

Microfiber, SBR Cushion, Silicone Print

Back Materials

Spandex, Colorful Reflective Elements

## Key Features

Ergonomic design featuring breathable materials and vibration-dampening palm pads.

### Performance Features

- Shock absorption with padded palms
- Breathable fabric for moisture management
- Enhanced grip with silicone printing
- Vibration dampening for long rides
- Reflective safety elements

### Recommended Use

Road Cycling • Mountain Biking • Recreational Riding
