

Paddy Field Soil Tillage Machine with Harrow

This paddy field soil tillage machine is equipped with a harrow for comprehensive soil preparation. It breaks up clumps and levels the surface to ensure optimal planting conditions.

Overview

Professional Paddy Field Soil Tillage

The 1ZS-25 is a robust agricultural implement specifically engineered for effective soil preparation in paddy fields. By integrating a harrow attachment, this machine facilitates comprehensive soil tillage, breaking up clumps and leveling the surface to create optimal planting conditions. Its durable design enhances soil aeration and promotes uniform seed distribution, directly contributing to improved crop yields in small to medium-sized operations.

Technical Specifications

Key Features

- Integrated harrow attachment
- Robust frame construction
- Ergonomic design for maneuverability
- Optimized tine positioning

Recommended Field Size

Small Fields • Medium Fields

Model Number

1ZS-25

Primary Application

Paddy Field, Soil Tillage, Soil Aeration
