

Paddy Rice Cleaning Machine

This machine is designed for cleaning paddy rice. It efficiently removes impurities such as dust, chaff, and other foreign materials from the paddy, ensuring a higher quality grain output.

Overview

CSQ Series Paddy Cleaner

The CSQ Series Paddy Cleaner is designed to efficiently remove impurities such as dust, chaff, and other foreign materials from paddy rice, ensuring a higher quality grain output. Built with robust construction, this machine delivers reliable performance in demanding agricultural processing environments. Its streamlined design allows for easy maintenance and adjustment, making it a versatile solution for various paddy processing applications.

Technical Specifications

Performance Metrics by Model

Model	Capacity (t/h)	Power (kW)	Spindle RPM	Dimensions (mm)
CSQZ70	1.5–2	2x0.2	920	1520x920x1920
CSQZ75	2–2.5	2x0.2	920	1660x1250x1960
CSQZ80	2.5–3	2x0.38	920	1660x1250x1960
CSQZ85	3–3.5	2x0.38	920	1660x1350x1960

Key Features

Primary Benefits

- Efficient removal of dust and chaff
- Robust construction for durability
- Easy maintenance and adjustment
- Optimized cleaning efficiency
