

Paddy Rice Separator Machine

This high-efficiency paddy separator separates paddy from mixtures of paddy and brown rice. It features dual separation units to increase throughput and improve separation accuracy.

Product Overview

High-Efficiency Paddy Separation

This high-efficiency paddy separator is designed specifically for separating paddy from a mixture of paddy and brown rice. Featuring dual separation units, it provides increased throughput and improved separation accuracy for professional rice processing. With adjustable settings for various paddy conditions and a durable build, this machine is an ideal solution for rice mills and processing plants looking for consistent, long-lasting performance.

Technical Specifications

Model Comparison

Model	Capacity (T/H)	Power (kW)	Dimensions (mm)	Weight (kg)
MGCZ46X16X2	2.5-4	2.2	1850X2200X2250	1100
MGCZ46X20X2	3.5-5	3	1850X2200X2250	1250
MGCZ60X20X2	5-7	4	2420X1630X2050	1600
