

Paddy Rice Separator Machine

This paddy rice separator is engineered for efficient separation and high yield. It features a compact structure and smooth operation, making it suitable for processing various kinds of rice and mixtures.

Overview

High-Efficiency Paddy Rice Separation

This series of paddy rice separators is engineered for high-yield operations and efficient grain processing. Featuring a compact, robust construction, these machines are designed to handle various types of rice and mixtures with smooth, reliable operation. Advanced features such as balanced de-stoning technology, adjustable wind volume, and effective dust collection ensure optimal performance and minimal space requirements in your facility.

Key Features

Operational Advantages

High Yield, Compact Structure, Adjustable Wind Volume, Balanced De-stoning, Dust Collection, Easy Maintenance

Technical Specifications

Model Performance Data

Model	Capacity (t/h)	Power (kW)	Weight (kg)
MGCZ45x20x2	5-6.5	3	1200
MGCZ1200x1000x16	4-5	2.2	800
MGCZ100x6	1-1.5	1.1	405
MGCZ100x8	1.5-2	1.1	450
MGCZ100x10	2-2.5	1.1	505
MGCZ100x12	2.2-3.6	1.5	510
TQSX120	7-10	0.3x2 + 0.75	600

Main Shaft Speed

300 rpm

MGCZ45x20x2

280 rpm

MGCZ1200x1000x16
